Includes: how I built ai-income-systems.com on Lovable using these exact prompts.

AI INCOME SYSTEMS LAB · ai-income-systems.com

BEFORE YOU START

These are not templates — they are engineered systems. Each one has a role, a context layer, an output spec, and a format instruction. Here is how to get the most out of them.

CONTENTS

+ n8n automation walkthrough · + The Lovable build story

PROMPTS 01-05

Build an audience and publish with authority on autopilot.

01 · CONTENT SYSTEMS

Turns one core idea into a full 90-day content calendar across every platform.

Claude · ChatGPT

ROLE

You are a professional content strategist and publishing architect with 10 years building authority brands in online business and AI.

CONTEXT

My business: [YOUR BUSINESS NAME AND NICHE]

Core audience: [DESCRIBE YOUR IDEAL CUSTOMER]

Main offer: [YOUR PRODUCT OR SERVICE]

Current platforms: [LIST PLATFORMS YOU PUBLISH ON]

TASK

Build me a 90-day content system using this one core idea: [YOUR BIG IDEA]

OUTPUT REQUIREMENTS

1. One “pillar” piece (long-form post, video script, or newsletter) per month – 3 total
2. Five derivative pieces per pillar, repurposed for each platform
3. Five short-form micro-hooks per pillar for social
4. The connecting narrative thread that makes all content feel like one brand story
5. A simple publishing sequence: what goes out when, and in what order

FORMAT

Organise by month. Include specific titles, not placeholders. Make the hooks punchy – I need real copy I can use today.

WHAT THIS PRODUCES

A complete 90-day content calendar with specific titles, hooks, and a cross-platform repurposing strategy: 3 pillar pieces, 15 derivatives, and 15 micro-hooks, all tied to a single narrative that builds authority and drives your offer.

02 · CONTENT SYSTEMS

Generates a full newsletter issue that reads like a human wrote it at 2am and nailed it.

Claude

ROLE

You are a newsletter writer known for making AI and online business feel approachable, real, and useful – not corporate or hype-driven. Your tone is a smart friend who happens to know everything about this stuff.

THIS WEEK'S ISSUE

Topic: [THIS WEEK'S TOPIC OR NEWS HOOK]

My take: [YOUR RAW OPINION – 2-3 SENTENCES IS FINE]

One thing I learned this week: [REAL THING FROM YOUR WEEK]

Current offer or CTA: [WHAT YOU WANT TO PROMOTE]

OUTPUT STRUCTURE

- Subject line: 3 options (curiosity / direct benefit / controversial take)
- Opening hook: 2-3 sentences that make them read further
- Main section: insight or lesson, 400-600 words, conversational
- "This week's system": one actionable thing they can do today
- Soft CTA that feels like a recommendation, not a pitch
- P.S. line that adds one more value nugget

TONE RULES

- No "in today's fast-paced digital landscape"
- First person, casual, honest. Contractions always.
- Sound like someone who is actually doing this, not observing it.

WHAT THIS PRODUCES

A complete, ready-to-send newsletter issue with 3 subject line options, full body copy, and a CTA that doesn't feel like a pitch. Plug in your raw inputs, get a polished issue in under 60 seconds.

03 · CONTENT SYSTEMS

Uses Perplexity to turn any topic into a competitive intelligence brief in minutes.

Perplexity

```
# USE IN: Perplexity (Pro mode recommended for deeper sources)
I need a competitive intelligence brief on: [YOUR TOPIC OR NICHE]

## MARKET LANDSCAPE
- Who are the 5-7 main players in this space?
- What are they charging, and how are they positioned?
- What do their audiences complain about most? (Check Reddit, reviews, forums.)

## CONTENT GAPS
- What questions are people asking that nobody answers well?
- What topics get search traffic but have weak coverage?

## POSITIONING OPPORTUNITY
- What angle is currently wide open?
- What would make someone the obvious choice in this niche right now?

## SOURCES
Cite all sources. I want real links, not summaries of summaries. Format the answer as a
structured brief I can use as a strategy document.
```

WHAT THIS PRODUCES

A cited, sourced competitive brief with real market data, pricing intel, content gaps, and a clear positioning opportunity. Run this before launching anything.

04 · CONTENT SYSTEMS

Generates a complete short-form video script optimised for retention and shares.

ChatGPT · Claude

ROLE

You are a short-form video scriptwriter for faceless educational channels with 100K+ subscribers. You hook fast, deliver dense value, and end with a reason to follow.

VIDEO BRIEF

Platform: [YOUTUBE SHORTS / TIKTOK / INSTAGRAM REELS]

Topic: [YOUR TOPIC]

Target viewer: [WHO IS WATCHING]

Goal: [GROW FOLLOWERS / DRIVE TO LEAD MAGNET / SELL PRODUCT]

Target length: [30 / 45 / 60 SECONDS]

SCRIPT STRUCTURE

- Hook (0-3 sec): pattern interrupt. No “hey guys, welcome back.”
- Problem agitation (3-10 sec): make them feel the pain or curiosity
- Value delivery (10-50 sec): useful content in punchy steps
- CTA (last 5 sec): one clear, friction-free action

FORMAT

- Include on-screen text suggestions in [brackets]
- Mark timing for each section
- Write the voiceover as natural speech, not formal copy
- Give me 2 hook variations

WHAT THIS PRODUCES

A production-ready video script with timing, on-screen text suggestions, 2 hook options, and a CTA. Designed for faceless content — no face required.

05 · CONTENT SYSTEMS

Generates an entire Pinterest keyword and pin strategy for organic traffic from zero.

Perplexity · Claude

```
# STEP 1 – Run in Perplexity first
Research Pinterest keyword trends for: [YOUR NICHE]
Find: trending searches, seasonal patterns, long-tail opportunities, and which pin
formats are performing right now.

# STEP 2 – Run in Claude with the Perplexity output
You are a Pinterest SEO strategist. I am starting from zero followers and need to drive
organic traffic to my lead magnet within 60 days.

My niche: [YOUR NICHE]
My lead magnet: [TITLE AND WHAT IT OFFERS]
Landing page URL: [YOUR URL]
Research: [PASTE STEP 1 OUTPUT HERE]

Deliver:
1. 10 Pinterest board names, keyword-optimised rather than creative
2. 30 pin title templates I can customise
3. 5 pin description templates with a hashtag strategy
4. A 30-day posting cadence: pins per day and what types
5. The 3 pin formats driving the most link clicks right now
6. One “hero pin” concept for my first viral attempt
```

WHAT THIS PRODUCES

A complete Pinterest traffic system: board strategy, 30 pin titles, description templates, and a 30-day posting plan designed to drive lead magnet downloads from day one with zero existing audience.

PROMPTS 06-10

Turn ideas and knowledge into sellable digital products.

06 · DIGITAL PRODUCT CREATION

Turns a topic idea into a fully structured, sellable digital product in one prompt.

Claude

ROLE

You are a digital product strategist who has designed 50+ info products generating \$1M+ combined. You know what sells, what people finish, and how to structure knowledge for results and minimal refunds.

MY PRODUCT IDEA

Topic: [YOUR IDEA IN ONE SENTENCE]

Target buyer: [WHO BUYS THIS AND WHY]

Price point: [\$X]

Format: [PDF / VIDEO COURSE / TEMPLATE PACK / ETC.]

DELIVER

1. Product title – 3 options, clear transformation over clever wordplay
2. A one-sentence value proposition that hits the emotional outcome
3. A complete module outline with a description for each section
4. The “quick win”: what can they do within 30 minutes of starting?
5. A bonus idea that adds perceived value without extra production time
6. Sales page headline (3 options) and 10 bullet points
7. An honest risk assessment: what makes this hard to sell, and how to fix it

Be direct. If my idea is weak, say so and tell me how to fix it.

WHAT THIS PRODUCES

A complete digital product blueprint: title options, full outline, quick-win structure, sales copy, and an honest critique. The difference between an idea and a product you can actually sell.

07 · DIGITAL PRODUCT CREATION

Generates a precise Lovable build prompt that actually works — no vague requests.

Claude · Lovable

ABOUT THIS PROMPT

Two-stage prompt. Stage 1 runs in Claude to produce a Lovable-ready spec. Stage 2 is that spec, pasted directly into Lovable.

STAGE 1 — Run in Claude

I am building a [TYPE OF APP OR SITE] using Lovable.

My app does: [CORE FUNCTION IN 2-3 SENTENCES]

Target user: [WHO USES IT]

Key pages needed: [LIST THEM]

Design vibe: [DARK/LIGHT, MINIMAL/BOLD, REFERENCE SITES]

Must-have features: [LIST CORE FEATURES]

Nice-to-have: [LIST OPTIONAL FEATURES]

Write a Lovable build prompt that:

- Specifies the exact page structure and navigation
- Describes UI components in enough detail for correct rendering
- Includes a colour palette (hex codes), typography, and spacing feel
- Lists all sections of each page in order, with content descriptions
- Calls out integrations needed (Stripe, email capture, and so on)
- Requests a mobile-responsive layout explicitly

Format the answer as a single clean prompt to paste directly into Lovable.

WHAT THIS PRODUCES

A Lovable-ready build spec specific enough to get real results on the first try. This is exactly how ai-income-systems.com was built: Claude spec → Lovable → live site.

08 · DIGITAL PRODUCT CREATION

Takes any knowledge you have and turns it into a lead magnet people actually want.

Claude · ChatGPT

ROLE

You are a conversion copywriter who specialises in lead magnets. You know the only ones that work solve a specific, immediate problem so well that getting the answer feels like cheating.

MY KNOWLEDGE BASE

What I know or do well: [YOUR SKILLS, EXPERIENCE, OR KNOWLEDGE]

My audience's #1 frustration: [WHAT THEY STRUGGLE WITH MOST]

My email list leads to: [YOUR MAIN PRODUCT OR SERVICE]

DELIVER

1. 5 lead magnet concepts: title, format, and what makes each irresistible
2. For your top pick: a full table of contents or outline
3. The opt-in page headline and subheadline
4. The confirmation email subject line and first 3 sentences
5. The one thing this must deliver in the first 2 minutes to justify every email I will ever send

SELECTION CRITERIA

Rank the 5 concepts by speed to create, conversion potential, and relevance to my offer. Be brutally honest about which one I should actually build.

WHAT THIS PRODUCES

5 ranked lead magnet concepts with outlines, opt-in copy, and the first email — plus a clear recommendation on which one to build first.

09 · DIGITAL PRODUCT CREATION

Designs a tiered pricing strategy that maximises revenue without pricing people out.

Claude · Perplexity

ROLE

You are a SaaS and digital product pricing strategist. You have helped bootstrapped creators design tiered offers that convert across budget levels and maximise lifetime value without devaluing the brand.

MY OFFER

What I sell: [DESCRIBE YOUR PRODUCT OR SERVICE CATEGORY]

Current price (if any): [CURRENT PRICE OR "NEW"]

Competitor pricing: [PASTE RELEVANT PRICING DATA FROM PERPLEXITY]

My audience: [WHO BUYS AND THEIR BUDGET RANGE]

My costs: [WHAT IT COSTS YOU TO DELIVER]

DELIVER

1. A 3-tier pricing structure with names, prices, and inclusions
2. The anchor strategy: what makes the middle tier the obvious choice?
3. One-time versus recurring: which model fits my offer better, and why?
4. The price I should NOT charge, and why (the dead zone)
5. A launch pricing strategy: start low and raise, or start at full price?
6. One upsell that adds real value without new product creation

WHAT THIS PRODUCES

A complete pricing architecture with tier structure, anchor strategy, launch recommendation, and one ready-to-implement upsell — built for your specific offer and market.

10 · DIGITAL PRODUCT CREATION

Long-form sales page copy that converts without sounding like a 2009 ClickBank product.

Claude

ROLE

You are a direct response copywriter with 15 years writing sales pages. You write with honest persuasion: no fake scarcity, no hollow hype – just a clear articulation of who this is for, what they get, and why.

PRODUCT INFO

Product name: [NAME]

Price: [PRICE]

What it is: [DESCRIPTION]

Who it is for: [IDEAL BUYER]

The #1 outcome: [MAIN TRANSFORMATION]

What they have tried before: [PAST FAILED SOLUTIONS]

Objections they will have: [LIST THE REAL OBJECTIONS]

Social proof: [TESTIMONIALS / RESULTS / YOUR OWN STORY]

WRITE THE FULL PAGE

Include: headline, subheadline, hook story, problem section, solution intro, feature and benefit breakdown, who it is for and who it is not for, social proof, pricing reveal, FAQ (5 questions), guarantee, and final CTA.

TONE

Confident, clear, honest. Reads like a real person, not a template.

WHAT THIS PRODUCES

A complete, production-ready sales page — every section, every word — that you can drop straight into Lovable, Webflow, or any builder.

PROMPTS 11-15

Find, pitch, and close clients without the awkward hustle.

11 · CLIENT ACQUISITION

Generates personalised cold email sequences that get responses — not templates.

ChatGPT · Perplexity

```
# STEP 1 – Research the prospect in Perplexity
Research this company or person: [PROSPECT NAME + COMPANY]
Find: recent news, what they are known for, current industry challenges, their content
and social presence, and any public pain points.

# STEP 2 – Write the sequence in ChatGPT
You are an outbound sales specialist who writes emails with 30%+ reply rates by being
genuinely useful, not pitchy.

My service: [WHAT YOU DO]
My outcome for them: [WHAT RESULT I DELIVER]
Prospect research: [PASTE STEP 1 OUTPUT]

Write a 3-email sequence:
- Email 1: pure value or observation. No ask. Reference something specific.
- Email 2 (day 3): one case study plus one soft ask
- Email 3 (day 8): the honest breakup email that often gets the most replies

# RULES
- Subject lines under 6 words
- Email 1 under 75 words total
- No “I hope this email finds you well”
- One CTA maximum per email, never two
```

WHAT THIS PRODUCES

A 3-email cold outreach sequence personalised to your actual prospect — not a generic template. Built to get replies, not just opens.

12 · CLIENT ACQUISITION

Preps you so thoroughly you sound like you have worked with them for months.

Perplexity · Claude

STEP 1 – Research in Perplexity

Give me a full business intelligence brief on: [PROSPECT / COMPANY]

Include: business model, revenue signals, team size, tech stack, recent activity, competitors, and likely challenges.

STEP 2 – Build the call framework in Claude

I have a discovery call with [PROSPECT] in [X] hours.

My service: [WHAT I DO]

Their business context: [PASTE PERPLEXITY OUTPUT]

My goal for this call: [BOOK PROJECT / CLOSE DEAL / QUALIFY]

Build me:

1. 5 diagnostic questions that show deep, non-generic knowledge
2. The most likely objections and exactly how to handle them
3. How to transition from discovery to proposal naturally
4. One pattern-interrupt observation that shows I did my homework
5. The close: how to end with a clear next step without being pushy

WHAT THIS PRODUCES

A complete call prep brief: questions, objection handlers, a natural close, and an opening line that differentiates you from every other vendor they will talk to.

13 · CLIENT ACQUISITION

Writes a complete client proposal that positions you as the obvious choice.

Claude

ROLE

You are a business development consultant who writes proposals that win. You know a proposal is not a list of services – it is a document that makes the client feel understood and certain.

PROJECT DETAILS

Client: [CLIENT NAME]

Their stated problem: [WHAT THEY TOLD ME IN THE CALL]

Their real problem: [WHAT I THINK IS ACTUALLY GOING ON]

My proposed solution: [WHAT I WILL DO]

Timeline: [HOW LONG]

Investment: [PRICE + PAYMENT TERMS]

WRITE THE PROPOSAL

1. Executive summary: what I heard, what I recommend, what the outcome is
2. Situation overview that shows I understand their world
3. Proposed approach: what I will do, in what order, and why
4. Timeline and milestones
5. Investment breakdown, framing value before price
6. Why me – specific, not generic
7. Next steps: one clear action to move forward

TONE

Professional but warm. A peer conversation, not a pitch deck.

WHAT THIS PRODUCES

A complete client proposal — every section — that you can drop into a document and send the same day. Designed to win, not just inform.

14 · CLIENT ACQUISITION

Designs a referral system and writes the exact messages to activate it.

Claude

```
# CONTEXT
My business: [WHAT YOU DO OR SELL]
Current clients or subscribers: [ROUGHLY HOW MANY]
Referral incentive I can offer: [WHAT IS REALISTIC FOR ME]
What the referred person gets: [THEIR BENEFIT]

# DELIVER
1. A referral system design: how it works, how it is tracked, what triggers payout
2. The email to existing clients and subscribers asking for referrals – conversational, grateful, not corporate
3. A follow-up for people who said they would refer but have not yet
4. A simple thank-you message for when a referral converts
5. Three ways to make referrals feel natural, not like an MLM

# CONSTRAINT
This has to work with fewer than 100 subscribers. No fancy software – just email and simple tracking.
```

WHAT THIS PRODUCES

A complete referral system with email templates, a follow-up sequence, and a tracking method — built for small lists, no software required.

15 · CLIENT ACQUISITION

Defines your AI service niche and the positioning that makes you the obvious expert.

Claude · Perplexity

```
# CONTEXT
I want to offer AI automation services.
Industries I am considering: [LIST 3-5]
My background: [YOUR SKILLS]
Tools I know or am learning: [n8n, CHATGPT API, CLAUDE API, ETC.]

# PERPLEXITY RESEARCH (run first)
Research: what AI automation problems are small businesses in [YOUR INDUSTRIES] paying
to solve right now?

# CLAUDE POSITIONING BUILD
Based on my background and this research: [PASTE PERPLEXITY OUTPUT]

Deliver:
1. My recommended niche: industry + problem + offer
2. My positioning statement – one sentence that makes my ideal client say “that's me”
3. Three services at three different price points
4. How to describe what I do without saying “AI automation” (too generic)
5. The first 5 businesses I should reach out to, and why
6. What I need to demonstrate before my first sales call
```

WHAT THIS PRODUCES

A complete AI agency positioning strategy: your niche, services, pricing, and first 5 prospects — a blueprint for launching an agency that doesn't sound like everyone else.

PROMPTS 16-20

Wire everything together so the business runs while you sleep.

16 · REVENUE AUTOMATION

Writes a 7-email nurture sequence that converts subscribers to buyers on autopilot.

Claude · n8n

ROLE

You are an email marketing strategist who builds sequences that feel like conversations, not campaigns. The best converting emails would still be worth reading even if you never sold anything.

SEQUENCE CONTEXT

Lead magnet they downloaded: [TITLE AND WHAT IT COVERS]

My main offer: [WHAT I AM ULTIMATELY SELLING]

Price: [\$X]

Audience pain: [WHAT KEEPS THEM UP AT NIGHT]

Audience desire: [WHAT THEY REALLY WANT]

My credibility: [WHAT MAKES ME QUALIFIED]

WRITE 7 EMAILS

Email 1 (day 0): welcome, lead magnet delivery, expectations

Email 2 (day 1): one insight that changes how they see the problem

Email 3 (day 3): a story that makes the solution real

Email 4 (day 5): the common mistake keeping them stuck

Email 5 (day 7): introduce the offer naturally – teach first, sell second

Email 6 (day 9): handle the #1 objection head-on

Email 7 (day 11): the honest close

Each email: subject line + preview text + full body (200–400 words).

WHAT THIS PRODUCES

7 complete emails — subject lines, preview text, full body — that run on autopilot and convert subscribers to buyers without you touching anything after setup.

17 · REVENUE AUTOMATION

Designs a complete n8n automation for any business process — node by node.

Claude · n8n

ROLE

You are an n8n automation specialist who designs workflows that work on the first run. You explain each node's purpose, not just its name, and flag common configuration pitfalls.

WORKFLOW REQUEST

I want to automate: [DESCRIBE THE PROCESS IN PLAIN ENGLISH]

Trigger: [NEW EMAIL / FORM SUBMISSION / SCHEDULE / WEBHOOK / ETC.]

Data inputs: [WHAT INFORMATION COMES IN]

Desired output: [WHAT SHOULD HAPPEN AS A RESULT]

Apps involved: [LIST THE SERVICES THAT NEED TO CONNECT]

n8n version: [CLOUD / SELF-HOSTED]

DELIVER

1. A full workflow description – a text diagram showing nodes and connections
2. Step-by-step configuration for each node
3. Sample data to test with
4. Common failure points and how to handle them
5. Error handling so the workflow does not silently fail
6. One phase-2 enhancement to make this more powerful

WHAT THIS PRODUCES

A complete n8n workflow design with node-by-node setup instructions, test data, and error handling guidance. Build your automation in one session instead of 12 open browser tabs.

18 · REVENUE AUTOMATION

Maps your existing skills and content into a complete passive income architecture.

Claude · Perplexity

ROLE

You are a digital business architect who helps people turn knowledge and skills into automated income streams. You are known for finding the minimum viable path – the fastest route to revenue before building complexity.

MY SITUATION

My skills and knowledge: [LIST EVERYTHING YOU KNOW OR DO WELL]

Time I can invest: [HOURS PER WEEK]

Existing assets (list, social, content): [WHAT I ALREADY HAVE]

Income goal in 90 days: [\$X PER MONTH]

What I absolutely will not do: [YOUR CONSTRAINTS]

DELIVER

1. My income system map: all streams ranked by speed to revenue, effort required, and scalability
2. My recommended 90-day path: the 3 streams to build, in order
3. The automation layer: what gets automated once stream 1 works
4. The first thing I should do tomorrow morning – one specific action
5. The trap to avoid: what most people in my situation waste time on

WHAT THIS PRODUCES

A ranked passive income architecture built from your actual skills and constraints, including a specific 90-day action plan and the automation layer to scale it.

19 · REVENUE AUTOMATION

Designs the full automated customer experience from first click to repeat purchase.

Claude · n8n

ROLE

You are a customer experience architect who designs automated journeys that feel human. The best automations feel like a smart team is watching and responding – not a drip sequence running on a timer.

MY BUSINESS

What I sell: [YOUR PRODUCT OR SERVICE]

Price points: [LOW / MID / HIGH TICKET OFFERS]

Current tools: [EMAIL PLATFORM, PAYMENT, ETC.]

Biggest drop-off: [WHERE DO PEOPLE GO COLD OR ABANDON?]

DELIVER – map the complete automated journey

1. Discovery → lead capture (first 5 minutes)
2. Lead → first purchase (nurture logic and triggers)
3. First purchase → completion (onboarding, quick win, check-in)
4. Completion → repeat purchase (re-engagement and upsell triggers)
5. Happy customer → referral (automated ask and follow-up)

For each stage: what the automation does, what triggers it, what it sends or shows, and what success looks like.

WHAT THIS PRODUCES

A complete automated customer journey map — every stage, trigger, and touchpoint — designed to run without you while feeling like attentive human service.

20 · REVENUE AUTOMATION

Builds an AI-powered monthly business review that tells you exactly what to do next.

Claude · n8n

ROLE

You are a business analyst and growth advisor. I am giving you my raw monthly numbers and you are going to tell me what they mean and what I should do differently next month. Be direct – I need signal, not support.

THIS MONTH'S DATA

Revenue: [TOTAL + BREAKDOWN BY PRODUCT OR SOURCE]

New leads and subscribers: [NUMBER AND SOURCE]

Email metrics: [OPEN RATE, CLICK RATE, UNSUBSCRIBES]

Traffic: [SESSIONS, TOP SOURCES, CONVERSION RATE]

Content published: [WHAT I PUT OUT AND WHERE]

Biggest win this month: [WHAT WORKED]

Biggest frustration: [WHAT DIDN'T]

DELIVER

1. What the numbers actually tell me – not what I want to hear
2. The one metric I should obsess over next month, and why
3. What to stop doing, and why it is a distraction
4. What to do more of, with specific targets
5. One experiment to run, with a clear success metric
6. My 3 priorities for next month, in order

WHAT THIS PRODUCES

A complete monthly business review: honest assessment, one metric to obsess over, what to stop, what to start, one experiment, and 3 priorities. Automate it in n8n: Schedule → input form → Claude API → email report.

THE AUTOMATION LAYER

n8n can be used as a managed Cloud service or as a self-hosted Community Edition. Here is how to choose a setup and connect it to these prompt systems responsibly.

Choose managed Cloud or self-hosted Community Edition → Secure credentials → Test workflow

Settings → Credentials → Add credential → OpenAI / Anthropic

Schedule → Set variables → OpenAI → Email you

Webhook → Claude API → Format → Send email → Log to sheet

Monthly trigger → Form → Claude API → Email report

THE BUILD STORY

No code. No developer. Here is exactly how Lovable and Claude became a live business.

IN MY WORDS

I built ai-income-systems.com in Lovable using these prompts. The trick is using Claude to write the spec first — then feeding that spec to Lovable.

WHAT'S NEXT

These 20 prompts are the foundation. The full AI Income Systems Lab course shows you how to combine them into complete income systems — each one built, automated, and running before you move to the next.
